

PERIMETER RETURN AIR ACCESS PANEL with REMOVABLE DOOR

RA-HP-PERI-R

The **Perimeter Return Air Access Panel with Removable Door** is designed for heat pumps. It is custom made to meet customer specific requirements.

The Removable Door System allows clear access for installation or service of the heat pump chassis. The door is lined with 1/2" thick Linacoustic RC insulation which provides superior acoustical and thermal performance.

Material:

Manufactured from corrosion resistant satin coat steel, the door is manufactured from 22 GA and the frame is made in 22 GA.

Finish:

Our durable "Appliance White" powder coat finish* blends seamlessly with any modern decor and our exclusive powder coat formula offers superior protection against condensation.

*Alternative colours and textures are available.
