

The **Service Access Panel** is designed for installation onto walls to provide access to HVAC equipment located in the interior.

The door is lined with 1/2" thick Linacoustic RC insulation for noise reduction.

**Material:**

The door (22 ga) and frame (18 ga) are manufactured from satin coat steel.

**Hardware:**

Push out magnets.

**Finish:**

Our durable "Appliance White" powder coat finish blends with any modern decor and offers superior protection against condensation.

Custom colours and textures are available.
